

Project Initialization and Planning Phase

Date	29 June 2026
Team ID	SWITD-2026-3278
Project Name	Credit Card Approval Prediction
Maximum Marks	3 Marks

Define Problem Statements(Customer Problem Statement Template):

Financial institutions receive a high volume of credit card applications, making manual review inefficient and prone to human error. Potential customers need a fast and fair decision on their applications, while the bank needs to minimize financial risk by accurately identifying creditworthy individuals.

Example:

A first-time credit card applicant with a limited credit history	Get a quick decision on my application so I can begin building my credit score.	The approval process is opaque and takes several business days to complete.	The bank uses manual review processes that are overwhelmed by high application volumes.	Anxious and uncertain about my financial planning.
