

Scalability & Future Plan

Date	02 July 2026
Team ID	SWTID-2026-3278
Project Name	Credit Card Approval Prediction
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Limited dataset size	May reduce prediction accuracy for new cases	High
2	Basic machine learning model	Performance can be improved with advanced models	Medium
3	No real-time bank database integration	Requires manual data entry	High

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports limited users	Deploy on cloud to support more users
2	Data Storage	Local dataset	Use cloud database for large-scale data storage
3	Performance	Basic prediction speed	Optimize model and use faster algorithms
4	Security	Basic validation	Add user authentication and encrypt sensitive data

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
-------	-------------------------------	-----------------	-----------------

Phase 2	Real-time bank database integration	Week 5	Better data quality and prediction accuracy
Phase 3	Advanced ML models (XGBoost/Random Forest)	Week 7	More reliable credit card approval predictions
Phase 4	Mobile App & Cloud Deployment	Week 8 (End of Internship)	Better user experience and easier result analysis
